ERRATA

[posted on February 8, 2013, 1:30 p.m.] The patterns for the keywords 'if' and 'input' start with the lower case letter 'i'.

[posted on March 8, 2013, 6:30 a.m.] The following are the updates

- *On page 4 of language specifications pdf, there is a declaration "type float: price". You must read 'float' as 'real'.*
- *TK_COMMA is not defined in the original document. Please define it in its natural meaning i.e. a single character , .*
- *Read 'print' as 'write' mentioned at various places in the original document.*
- *The name TK_FIELD of the token for the field identifier in Rule A9 in the document describing the analysis of rules is replaced with TK_FIELDID*
- *Rule 32 of the document describing the analysis of rules should be*
  <allVar>===><var>| TK_RECORDID TK_DOT TK_FIELDID
